

Addition

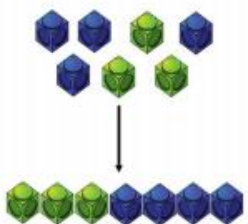

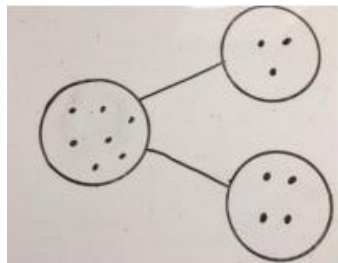

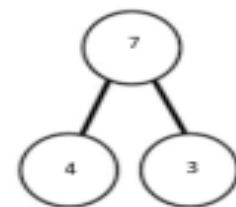

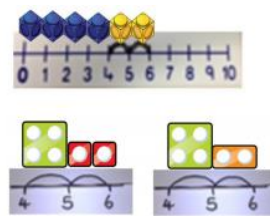

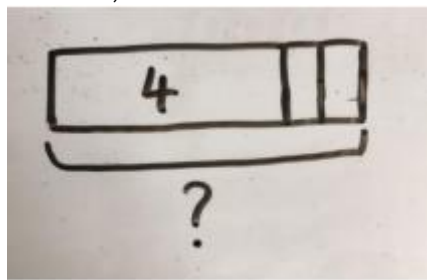

Early Years Foundation Stage

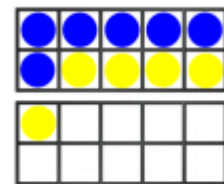

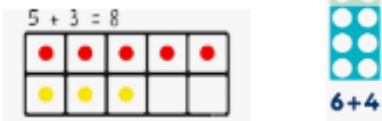

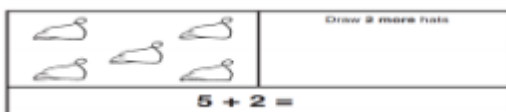

Key Vocabulary: add, more, and, make, sum, total, altogether, is the same as, one more two more, how many more to make...?

Learning Intentions	Concrete	Pictorial	Abstract
<p>Counting on in ones from different starting points</p> <p>Uses the language of 'more' to compare two sets of objects</p> <p>Finds the total number of items in two groups by counting all of them</p> <p>Says the number that is one more than a given number</p> <p>Finds one more or one less from a group of up to five objects, then ten objects</p> <p>add two single-digit numbers and count on or back to find the answer</p>	<p>Children are encouraged to develop a mental picture of the number system in their heads to use for calculation.</p> <p>Children count forward from different starting points.</p> <p>Children are given opportunities to use counting on during play situations (e.g. How many teddies have come to the picnic?)</p> <p>Children learn songs and rhymes involving counting.</p> <p>Children will be encouraged to mark make to represent their thinking.</p>		<p>A range of resources e.g. dominoes and dice are used to build up a visual representation of numbers.</p> <div><div>Recognise numbers 0 to 10</div><div>0 1 2 3 4 5 6 7 8 9 10</div></div> <hr/> <div><div></div><div>1, 2, 3, 4, 5, 6 ... there are 6 teddies</div><div>Count reliably up to 10 everyday objects</div></div>

Year One

Key Vocabulary: add, more, plus, make, sum, total, altogether, is the same as, equals, balances, sign, one more, two more, ten more, how many more is...?
How many more is... than...?

Learning Intentions	Concrete	Pictorial	Abstract
Combining two parts to make a whole: part part whole (PPW) model	Combining two parts to make a whole (use other resources too e.g. eggs, shells, teddy bears, cars). 	Children to represent the cubes using dots or crosses. They could put each part on a part whole model too. 	$4 + 3 = 7$ 4 is a part, 3 is a part and the whole is seven. 
Counting on from the biggest number	Using number lines, cubes or Numicon 	A bar model which encourages the children to count on, rather than count all. 	The abstract number line: What is 2 more than 4? What is the sum of 2 and 4? What is the total of 4 and 2 or $4 + 2$? 
Regrouping to make 10	Using ten frames and counters/cubes or using Numicon. $6 + 5$	Children to draw the ten frame and counters/cubes.	$7 + 4 = 11$ If I am at seven, how many more do I need to make 10. How many more do I add on now? Children to develop an understanding of

			equality e.g. $6 + \square = 11$ $6 + 5 = 5 + \square$ $6 + 5 = \square + 4$										
Represent and use number bonds and related subtraction facts within 20	<p>5 + 2</p>  	<p>4 + 3 = 7</p> <table data-bbox="1016 580 1543 732"><tr><td>X</td><td>X</td><td>X</td><td>X</td><td>0</td></tr><tr><td>0</td><td>0</td><td></td><td></td><td></td></tr></table> 	X	X	X	X	0	0	0				Emphasis should be on the language '1 more than 5 is equal to 6' '2 more than 5 is 7' '8 is 3 more than 5' 8 + 2 balances 10
X	X	X	X	0									
0	0												

Year Two

Key Vocabulary: add, addition, more, plus, make, sum, total, altogether, is the same as, equals, balances, sign, one more, two more, ten more, how many more is...? How many more is... than...?

To add 3 1-digit numbers	<table><tr><td></td><td></td><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td><td></td><td></td></tr></table> <p>$4 + 3 + 6 =$ Combine to make 10 if possible, bridge 10 and add 3rd digit or use near doubles then add 3rd digit</p>																					<p>Combine the two numbers that make/bridge 10 then add on the 3rd</p> $\begin{array}{c} \textcircled{4} + 7 + \textcircled{6} = \boxed{10} + \boxed{7} \\ \quad \quad \quad \underbrace{\quad \quad \quad}_{10} \\ \quad \quad \quad = \boxed{17} \end{array}$	$7 + 5 + 3 =$ I know $7 + 3 = 10$. Then add the 5 it balances 15. $4 + 5 + 4 =$ I know that double 4 equals 8. Then add 5 more. The answer is 13.

Subtraction

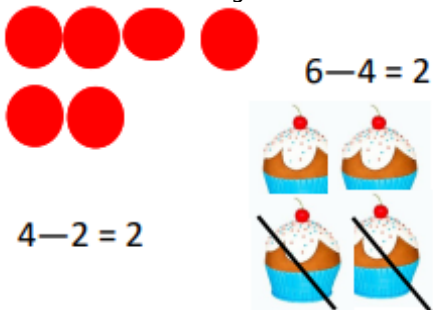

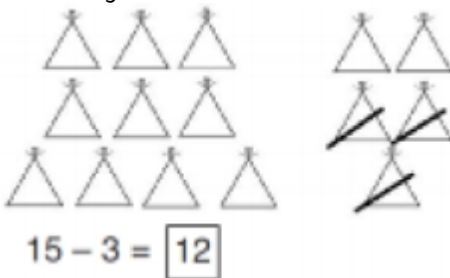

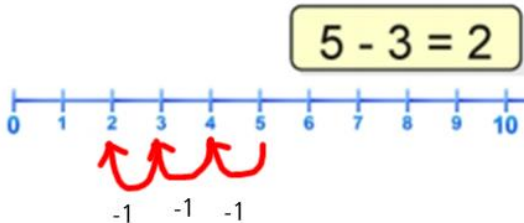

Early Years Foundation Stage

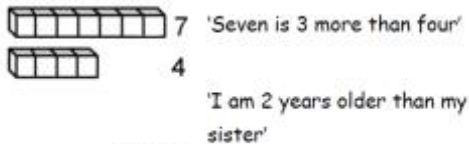

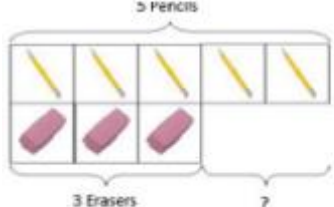

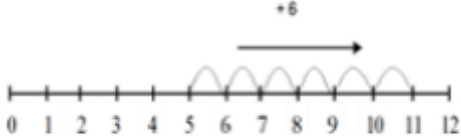

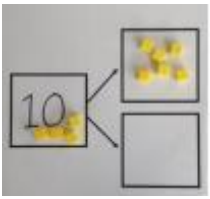

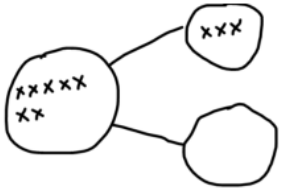

Key Vocabulary: take (away), leave, how many are left/left over? How many are gone? One less, two less, difference between, how many have gone?

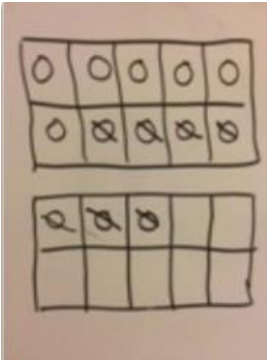

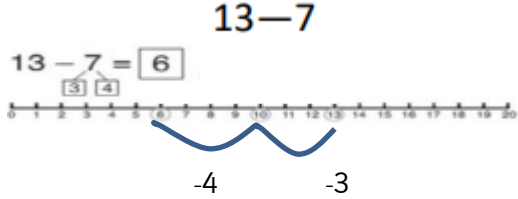

Learning Intentions	Concrete	Pictorial	Abstract
<p>Counting backwards from different starting points</p> <p>Uses the language of 'fewer' to compare two sets of objects.</p> <p>Finds one less from a group of up to five objects, then ten objects</p> <p>In practical activities and discussion, beginning to use the vocabulary involved in subtracting</p> <p>Say which number is one less than a given number</p> <p>Using quantities and objects, they subtract two single-digit numbers and count back to find the answer</p>	<p>Children are encouraged to develop a mental picture of the number system in their heads to use for calculation.</p> <div data-bbox="495 528 1384 762"> <div> <p>Begin to count backwards in familiar contexts such as number rhymes or stories</p> <p>Five fat sausages frying in a pan ...</p>  </div> <div> <p>Ten green bottles hanging on the wall ...</p>  </div> <hr/> <div> <p>10, 9, 8, 7 ...</p> </div> <div> <p>Continue the count back in ones from any given number</p> </div> </div> <p>Children are given opportunities to practise counting backwards in a variety of contexts e.g. by jumping on an outdoor number line, learning songs and rhymes.</p> <p>Children are introduced to the concept of difference through play. E.g. Who has the most? How many more do you have?</p> <div data-bbox="425 1189 918 1348">  </div>		

Year One

Key Vocabulary: subtract, take (away), minus, leave, how many are left/left over? How many are gone? One less, two less, ten less, how many fewer is...than...? How much less is...? difference between, is the same as, equals, balance, sign

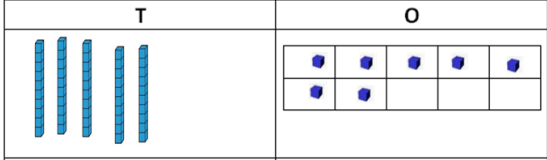

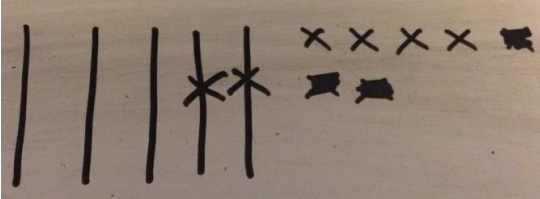

Learning Intentions	Concrete	Pictorial	Abstract
<p>Taking away ones</p> <p>*Must ensure that children are ready to use the - sign</p>	<p>Physically taking away and removing objects from a whole (ten frames, Numicon, cubes and other items such as beanbags could be used).</p>  <p>$6 - 4 = 2$</p> <p>$4 - 2 = 2$</p>	<p>Cross out drawn objects to show what has been taken away.</p>  <p>$15 - 3 = 12$</p>	<p>$7 - 4 = 3$</p> <p>$16 - 9 = 7$</p>
<p>Counting back</p>	<p>Moves objects away from group counting back</p>  <p>Move the beads back along the beadstring as you count backwards</p>	<p>Count back in ones using the number line</p>  <p>$5 - 3 = 2$</p>	<p>Put 13 in your head, count back 4. What number are you at?</p>

			
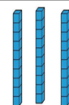

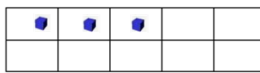

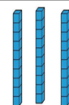

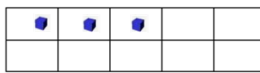

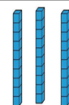

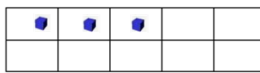

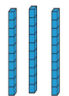

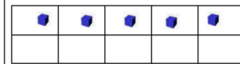

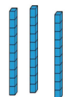

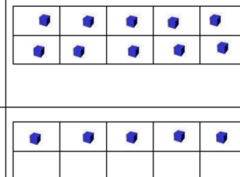

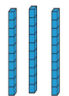

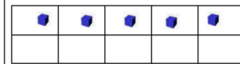

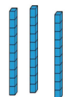

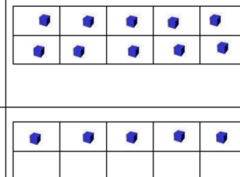

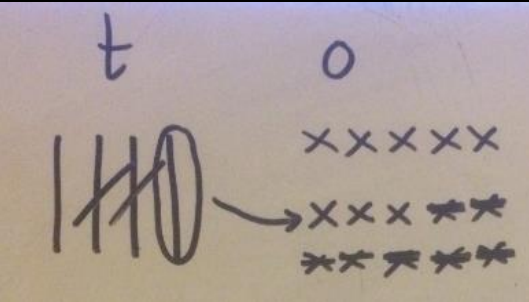

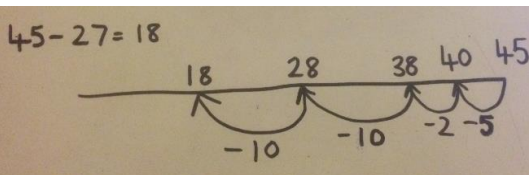

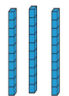

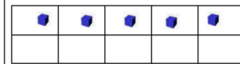

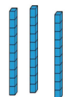

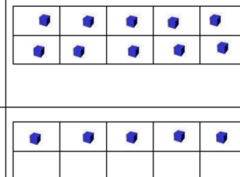

Finding the difference	<p>Compare different amounts</p>   <p>Lay objects to represent bar model.</p>	<p>Count on using the number line to find the difference</p> 	<p>Hannah has 12 sweets and her sister has 5. How many more does Hannah have than her sister?</p> $12 - 5 = 7$
Represent and use number bonds and related subtraction facts within 20	<p>Link to addition by using the PPW to model the inverse</p>  <p>If 10 is the whole and 6 is one of the parts. What is the other part? $10 - 6 = 4$</p>	<p>Use pictorial representations to show the part.</p> 	<p>Move to using number within the PPW model</p> 

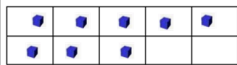

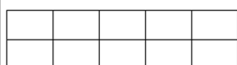

Make 10	<p>Make 14 on the ten frame. Take 4 away to make ten. Then take one more away so that you have taken 5.</p> 	<p>Draw the 10 frame and use crosses for ones. Then cross out 3. Then cross out 4.</p> 	<p>$13 - 7$</p> 
---------	---	--	--

Year Two

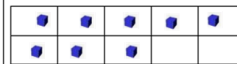

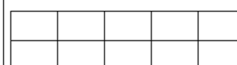

Key Vocabulary: subtract, take (away), minus, leave, how many are left/left over? How many are gone? One less, two less, ten less, how many fewer is...than...? How much less is...? difference between, is the same as, equals, balance, sign

Learning Intentions	Concrete	Pictorial	Abstract
To subtract without bridging ten (no regrouping)	<p>$57 - 24 =$</p>  <p>Children to use the Dienes to make the biggest number. Then physically remove. Always taking away the ones first. Then minus the tens. Then</p>		<p>$57 - 24 = 33$ $7 - 4 = 3$ $50 - 20 = 30$ $30 + 3 = 33$</p>

	<div>recombine</div> <table><tr><th>T</th><th>O</th></tr><tr><td></td><td></td></tr></table>	T	O				<div><div>57</div><div>-24</div><div><div></div><div>33</div></div></div> <div>x</div>				
T	O										
											
<div>To subtract when bridging ten (re-grouping)</div>	<div>45 - 27 =</div> <div>Begin by making 45 using the Dienes.</div> <table><tr><th>T</th><th>O</th></tr><tr><td></td><td></td></tr></table> <div>Because there are not enough ones to subtract from, then exchange a ten for ten ones. Then there will be 3 tens +15 ones</div> <table><tr><th>T</th><th>O</th></tr><tr><td></td><td></td></tr></table> <div>Then subtract the ones</div>	T	O			T	O			<div></div> <div></div>	<div><div><div>t</div><div>o</div></div><div><div>³4</div><div>¹5</div></div><div><div>-27</div><div><div></div><div>18</div></div></div></div>

T	O
	
	

Multiplication

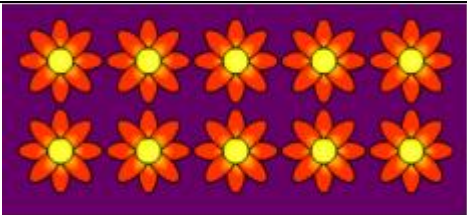

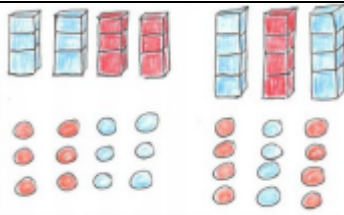

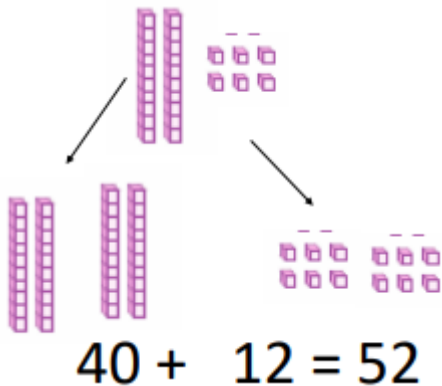

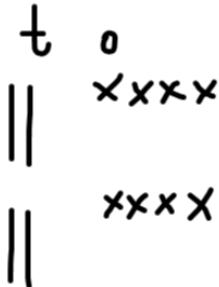

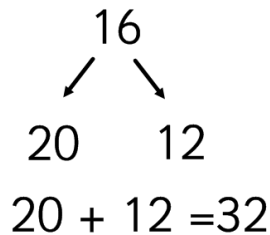

Early Years Foundation Stage

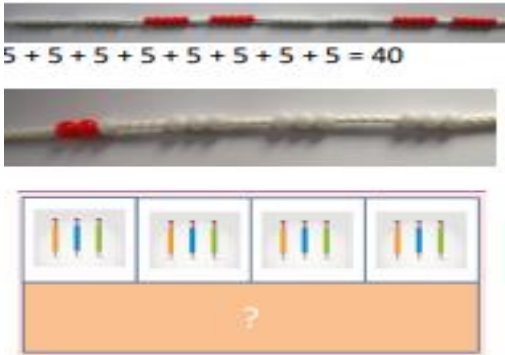

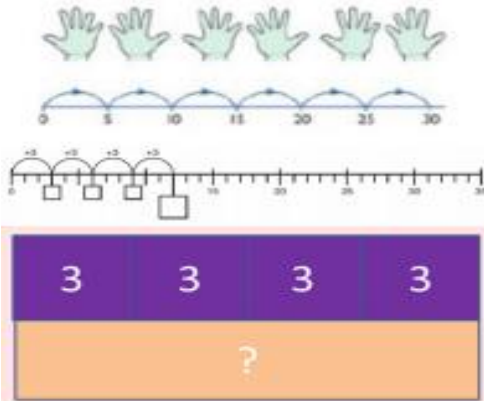

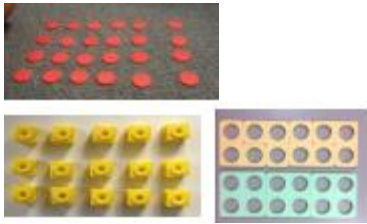

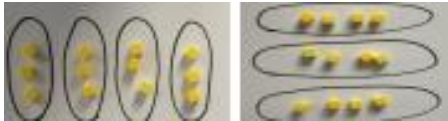

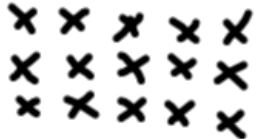

Key Vocabulary: odd, even, groups of, lots of, double, pattern

Learning Intentions	Concrete	Pictorial	Abstract
<p>Count in different groups using number rhymes</p> <p>They solve problems including doubling</p> <p>They solve practical problems that involve combining groups of 2, 5 or 10,</p>	<p>Children will experience equal groups of objects and will count in groups. They will work on practical problem solving activities involving equal sets or groups. E.g. jump along a number line in 2s.</p>  <p>How many socks do 4 children wear?</p>  <p>1 ,2 ,3 ,4, 5, 6, 7 ,8</p>	<p>I give you each 4 strawberries how many Are there altogether?</p>  <p>1,2,3,4 5,6,7,8</p>	

Year One			
Key Vocabulary: odd, even, double, near double, multiple, pattern, times, multiplied, groups of, lots of			
Learning Intentions	Concrete	Pictorial	Abstract
Doubling (up to double 10)	<p>Use practical activities using manipulatives including cubes and Numicon to demonstrate doubling</p>  <p>double 4 is 8 $4 \times 2 = 8$</p>	<p>Draw images to double numbers</p>  <p>$4 + 4 = 8$</p>  <p>$3 + 3 = 6$</p>	<p>$4 + 4 = 8$ $5 + 5 = 10$ $12 = 6 + 6$ $3 + ? = 6$</p>
Counting in multiples	<p>Count the groups as children are skip counting, children may use their fingers as they are skip counting.</p> 	<p>Children make representations to show counting in multiples.</p> 	<p>Count in multiples of a number aloud. Write sequences with multiples of numbers.</p> <p>2, 4, 6, 8, 10 5, 10, 15, 20, 25 , 30</p>

			
Repeated addition	<p>Use different objects to add equal groups</p> 	<p>There are 3 sweets in one bag. How many sweets are in 5 bags altogether?</p>  	<p>Write addition sentences to describe objects and pictures.</p> 
Understanding Arrays	<p>Use objects laid out in arrays to find the answers to 2 lots of 5, 3 lots of 2 etc.</p>	<p>Draw representations of arrays to show understanding.</p>	<p>3 lots of 2 = 6 5 times 2 = 10</p>

			
Year Two Key Vocabulary: odd, even, double, near double, multiple, pattern, times, multiplied, groups of, lots of			
Learning Intentions	Concrete	Pictorial	Abstract
Doubling	Doubling using place value using Dienes  $40 + 12 = 52$	Double $24 = 48$ 	Partition a number and then double each part before recombining it back together.  $20 + 12 = 32$
Counting in multiples Of 2s, 3s, 5s, 10s (forwards and backwards)	Count the groups as children are skip counting, children may use their fingers as they are skip counting. Use bar models.	Number lines, counting sticks and bar models should be used to show representation of counting in multiples.	Count in multiples of a number aloud. Write sequences with multiples of numbers. 0, 2, 4, 6, 8, 10

			<p>0, 3, 6, 9, 12, 15</p> <p>0, 5, 10, 15, 20, 25, 30</p>
<p>Multiplication is commutative</p>	<p>Create arrays using counters and cubes and Numicon</p>  <p>Pupils should understand that an array can represent different equations and that, as multiplication is commutative, the order of the multiplication does not affect the answer</p> 	<p>Use representations of arrays to show different calculations and explore commutativity.</p>  <p>$3 \times 5 = 15$ (3 5 times)</p>  <p>$5 \times 3 = 15$ (5 3 times)</p>	<p>$12 = 3 \times 4$ $12 = 4 \times 3$</p> <p>Use an array to write multiplication sentences and reinforce repeated addition.</p>  <p>$5 + 5 + 5 = 15$ $3 + 3 + 3 + 3 + 3 = 15$ $5 \times 3 = 15$ $3 \times 5 = 15$</p>

Using the Inverse

This should be taught alongside division, so pupils learn how they work alongside each other.

$$3 \times 4 = 12$$

$$4 \times 3 = 12$$

$$12 \div 4 = 3$$

$$12 \div 3 = 4$$

20	
4	5

$$\square \times \square = \square$$

$$\square \times \square = \square$$

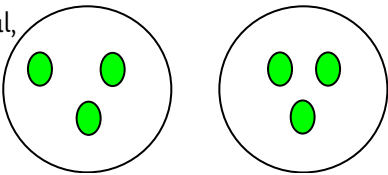

$$\square \div \square = \square$$

$$\square \div \square = \square$$

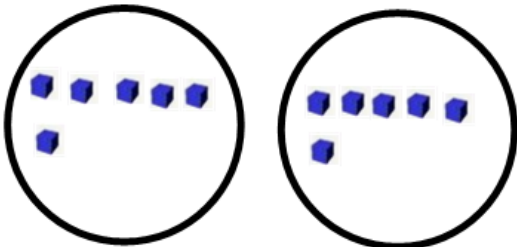

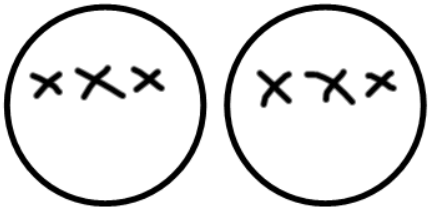

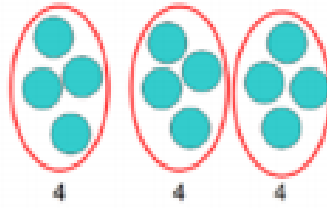

Division

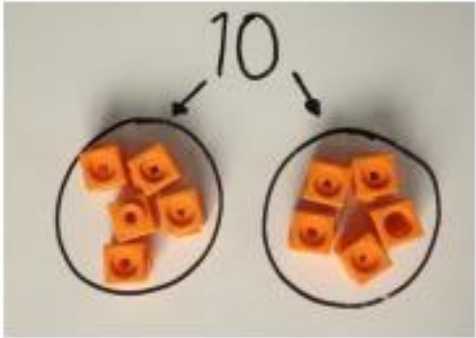

Early Years Foundation Stage

Key Vocabulary: half, halves, smallest, less, equal groups, share, equally

Learning Intentions	Concrete	Pictorial	Abstract
<p>Count back in 1s from any given number</p> <p>Begin to count back using number rhymes</p> <p>They solve problems involving halving and sharing</p> <p>They solve practical problems that involve sharing into equal groups</p>	<p>In division children will be introduced as both sharing and grouping using a variety of resources. Children will understand equal groups and share items out in play and problem solving.</p> <p>The focus at this stage will be practical, with the teacher demonstrating, and using the correct vocabulary.</p> <p>Children solve grouping problems</p>	 <p>If I have 6 buttons and I share them between 2 people, how many will each person get?</p>  <p>‘Get yourselves into groups of ___’.</p>	

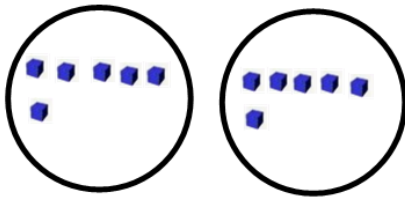

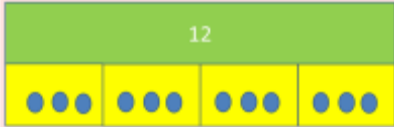

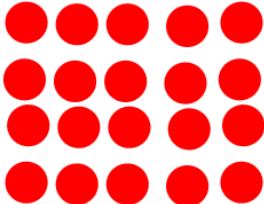

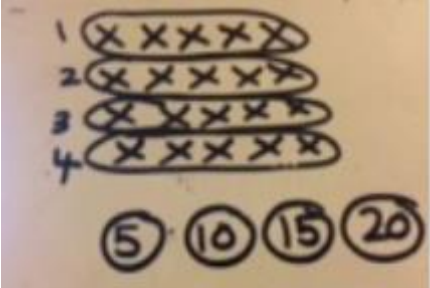

<h1>Year One</h1> <p>Key Vocabulary: half, halves, smallest, less, equal groups, share, equally, divide, division, group, half</p>			
Learning Intentions	Concrete	Pictorial	Abstract
Halving	<p>Children use practical apparatus to share equally</p> 	<p>Use a picture to share in two sets equally</p>  <p>Half of 6 = 3</p>	<p>Half of 4 = 8 $\frac{1}{2}$ of 4 = 8</p> <p>I know that double 4 balances 8 so half of 8 is 4.</p>
Division as sharing	<p>I have 10 cubes, can you share them equally in 2 groups?</p>	<p>Sharing:</p>  <p>12 shared between 3 is 4</p>	<p>12 shared between 4 groups is 3</p> <p>If I share 6 sweets equally between 2 friends, they will have 3 each.</p>

	  		
--	--	--	--

Year Two

Key Vocabulary: half, halves, smallest, less, equal groups, share, equally, divide, division, group, half

Learning	Concrete	Pictorial	Abstract
----------	----------	-----------	----------

Intentions			
Division as sharing	<p>Divide quantities into equal groups. Use cubes, counters, objects or place value counters to aid understanding.</p> 	 <p>Children use bar modelling to show and support understanding.</p>  <p>$12 \div 4 = 3$</p>	<p>Use inverse I know that $3 \times 4 = 12$ so $12 \div 3 = 4$</p>
Division as grouping	<p>I have 20 pencils. 5 go in each pot. How many pots will I need?</p> 		<p>Use inverse I know that $5 \times 4 = 20$ so there will be 4 pots.</p>
